

Dear Mr. Charlie Lustman:

Thank you for participating at our annual Spectrum Health Cancer Center, “National Survivors Day Event” held on June 3, 2015. More than 300 guests attended this spectacular event, including cancer survivors recently diagnosed and in treatment, friends, and family members. The event was a great success especially with your contribution in interacting with the attendees on a much more personal level.

We received great feedback from patients who were inspired by your journey. Your involvement made a real difference in our efforts to inspire, motivate, educate, and give hope to cancer patients and their family members. As an example, one of our infusion patients in particular expressed that your kindness and encouragement meant a lot to him and he really enjoyed spending time and conversing with you about his own journey as well.

Your CD, the Charlie Lustman “Made Me Nuclear”, was very well received by our attendees. Everyone enjoyed the songs that are designed to encourage, give inspiration, and provide empathy within the health community for all those who are going through the ultimate challenges of cancer.

Thanks to your inspiration, charm, and outgoing personality you helped our team to achieve such a successful outcome.

We look forward to working with you in the future.

Sincerely,

Judy L. Smith, M.D., M.S., CPE, FACS
Chief, Department of Oncology
Spectrum Health Cancer Center

Angela Ditmar, MBA, BSA, RN
Sr. Director of Oncology,
Spectrum Health Cancer Center
Director of Pulmonary Diagnostics
& Respiratory Services
